## From the Editors Desk

Sharing my thoughts on something that I read on Choice ....

### Choice .....

**Is the most powerful tool we have. Everything boils down to choice. We exist in a field of infinite possibilities. Every choice we make shuts an infinite number of doors. At any point we can change the direction of our lives by a simple choice. It is all in our hands, our hearts and our minds ...**

### My musings .....

Is choice a precursor to Change, cause with every choice comes an inevitable change and we need to embrace this change for it to transpire or eventuate.

Self-reflect and think of any situation wherein your choices have not lead to a change – it could be a change in behavior, thoughts or even lifestyle.

At times we may be too scared to make a particular choice, fearing the consequences of the change that it could bring about.

It could be a tearful heartbreak end to a relationship, or moving away from friends to secure a different job, changing a career goal, or taking a decision to move on ahead with your life after a terrible loss of your loved one, or even as simple as choosing to establish a fitness regime.

So what is of essence over here is to learn to adapt to the change in its entirety, embrace it in its wholeness, and then only will you witness the attainment of your choice.

After all, as said this choice will certainly open infinite doors and lead us in our journey called LIFE.....

Happy Reading , Stay Healthy

# The Hidden Danger

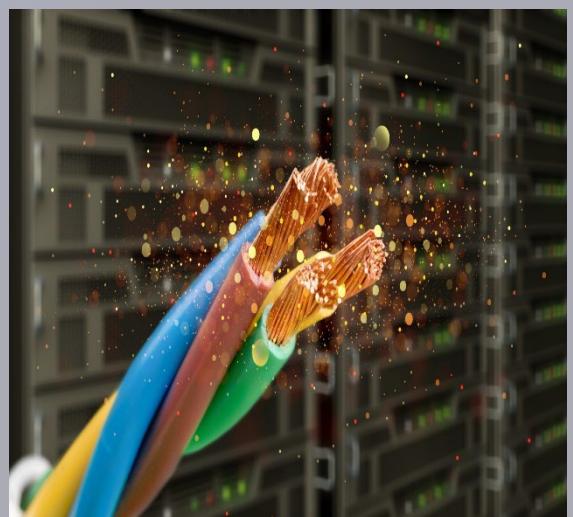

**We know that since evolution and much before that, there exists an immense and unforeseen force, called electromagnetism, that has a profound effect on every living organism.**

**In fact it is this very magnetic field that shields the Earth from the hostile atmosphere of the universe.**

With the advent of modernization and electrification of our homes and the spaces around us , we have created an electric power network around us – right from our house hold appliances to mobiles , laptops to wifi , to wifi controlled homes and to fitbits to monitor our sleep and health pattern , to even temperature controlled electric tiffin's to voice enabled devices .

This being called as one of the greatest achievement for the betterment of the society. However is it a boon or bane, the extensive use of energy for power and communications has radically changed the total electromagnetic field of the Earth.

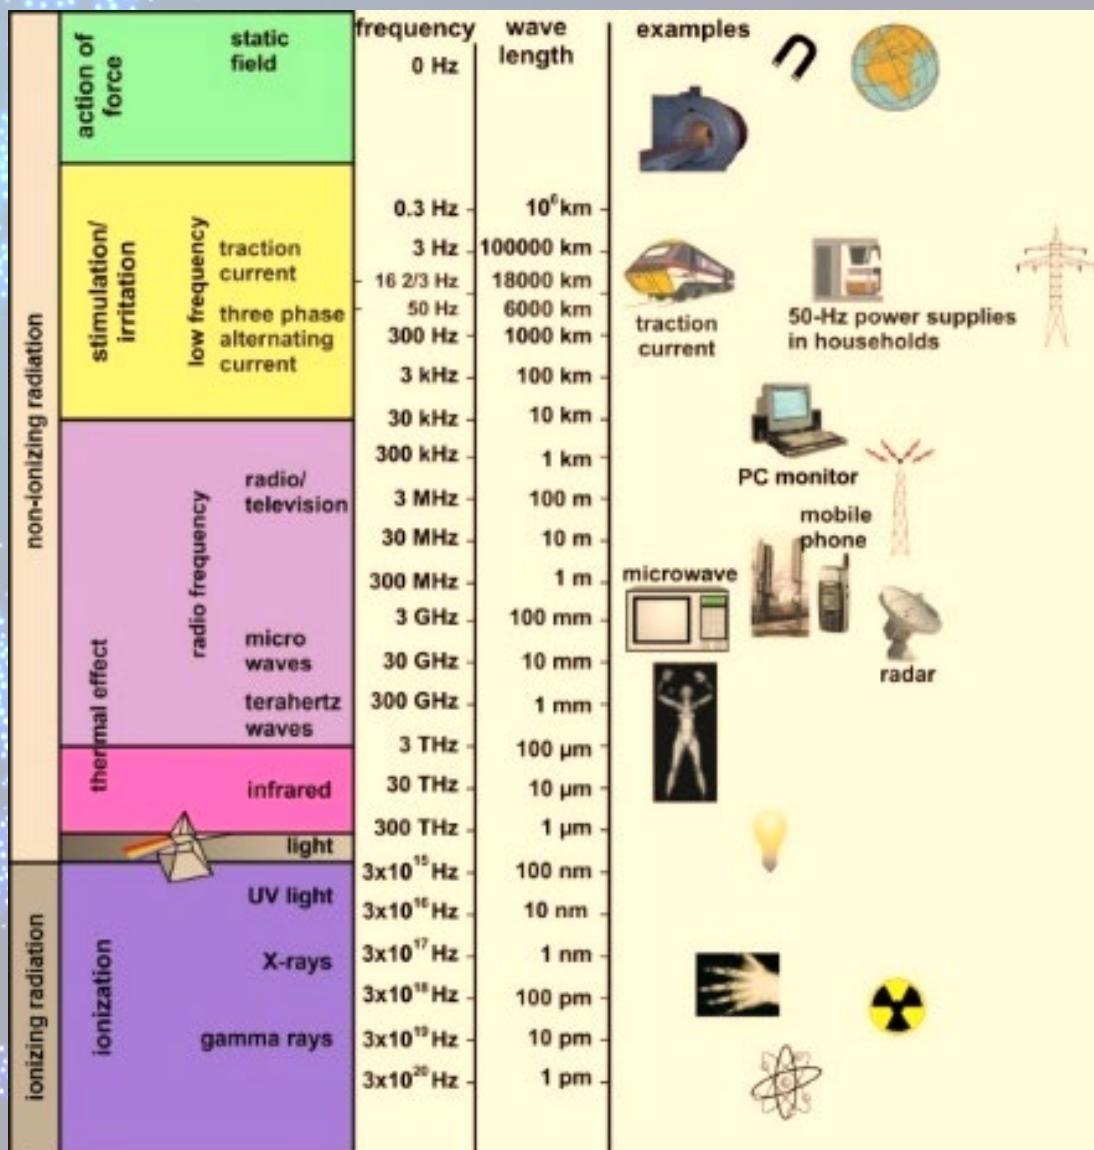

Since its not visible to us or can be felt, we are yet to realize it however the alarming rise in autoimmune diseases, birth abnormalities, cancer and psychological defects .

While there have been hundreds of papers published on this and numerous research carried out , however we are yet to wake up to this Peril at bay ,and we need to take corrective measures before it's too late. As today we swim in a sea of energy that is almost totally manmade .

This electromagnetic jungle that now surrounds us has profound implications and somewhere if we stop to think and analyze that this unnatural field may be effecting us biologically and may be harmful .

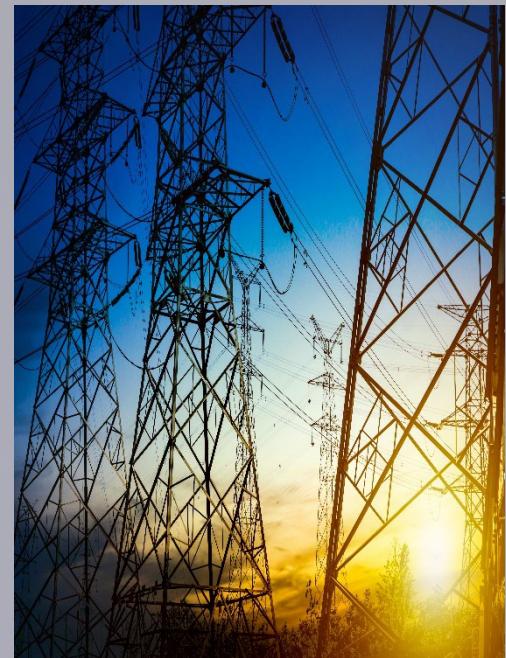

The Electromagnetic Spectrum

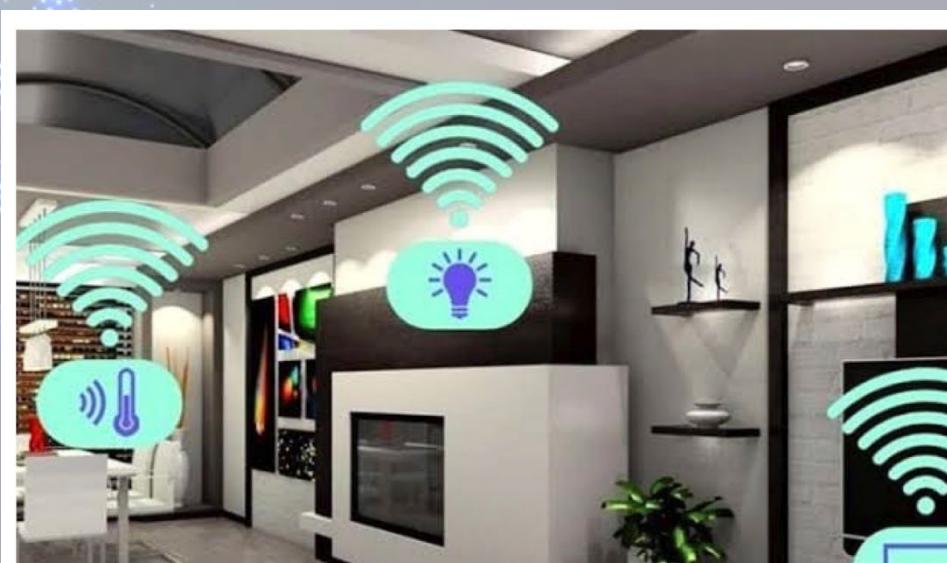

While all this while we have been lead to believe that extremely low frequencies do not cause any damage to the living things and it has been considered SAFE to use these devices.

There has been a frightening increase in homes full of electric gadgets – refrigerators, TV sets , home theatres , microwave ovens , mobiles , wifi routers, hair dryers , electric shavers , the list goes on and on .

On top it , mobile towers atop residential buildings , High tension electric poles near public places like schools , hospitals , residential complex .

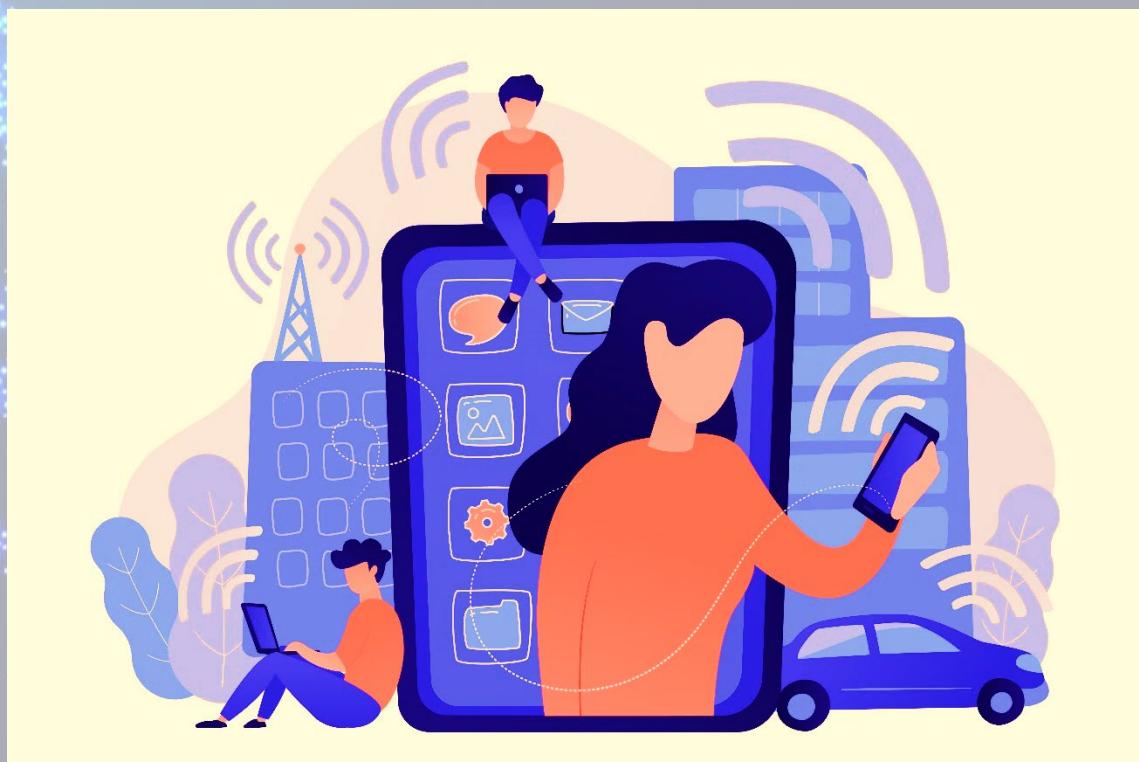

**The question  
remains DO  
THESE  
EFFECT US ?**

# Effects of Electromagnetic Radiation

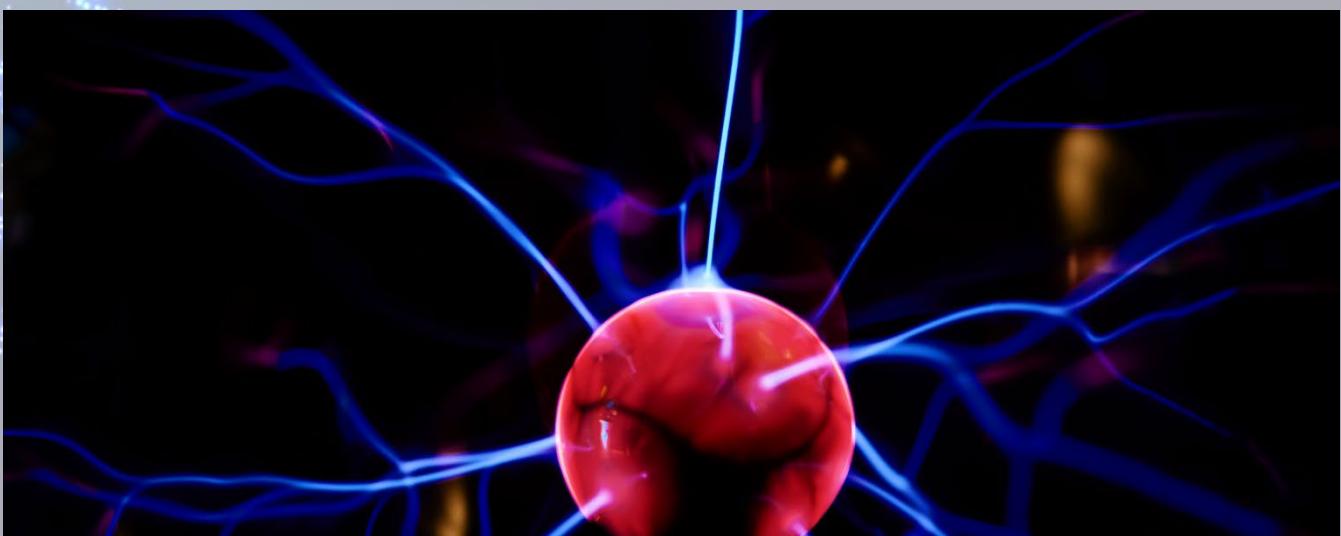

To put it in simple words, each electromagnetic field produced by our devices contains energy, for example the TV pictures on the receivers in our living rooms are produced by the conversion of the energy of the signal given off by the transmitter into electrical energy of the antennas.

As we sit watching TV , our bodies are receiving the same energy – as well as the energy from all other TV stations and from FM and AM radio stations , shortwave transmitters , radar devices , electric- power transmission lines and more . It would not be incorrect to say that there is no place on Earth that is free from this electromagnetic contamination.

So while as previously mentioned, there have been studies in the past and in present to elaborate that this extremely low frequency (ELF) Radiation from electrical power lines does not produce any biological effect, however as early as 1979 Dr. Nancy Wertheimer made a startling and alarming discovery and even such low frequencies were related to the incidence of childhood cancer.

**It was concluded the exposure to power lines and to other 60 – cycle radiation from appliances at levels commonly found in the environment produces a series of harmful and non-altering changes in the body.**

## Few of the Biological non-altering changes are listed as below –

- Increases the rate at which human cancer cells grow – act as cancer promoters
- Increases the incidence of childhood cancers
- Alterations in long lasting behavioral change – decreased levels of dopamine and serotonin – these are known to be associated with behavioral and psychological mechanisms.
- Changes in the production of certain vitally important brain chemicals called neuro hormones.
- May lead to increased incidence of birth defects and fetal malformations.
- Alterations in learning ability.
- Prolonged exposure also decreases the efficiency of the immune system.

We could go on with the extremely detrimental effects of low frequency radiations, however let me sum it up by saying that all abnormal, man-made electromagnetic fields, regardless of their frequencies, produce some or the other biological, physiological or psychological effect on us and our children.

## **The Risk and the Benefit – What Can You do ?**

We need to do a self-risk benefit analysis, for eg . an automobile may be termed as potentially dangerous, however in today's society this has become an essential commodity.

Most of us still live under the misconception that the health risk associated with electromagnetic radiation is primarily from external sources like high tension wires, mobile towers etc , however they are unaware of the substantial risks associated with the use of many devices in their own homes .

So while it's not easy to escape from this electrical maze , since our society runs on electromagnetic energy , however we can control the use of electromagnetic devices in our homes .

Let us have a look of a few common items that we use in our daily lives –

## Television sets

## Computers / Laptops /

## Tablets

## Fluorescent lights

## Electric clocks /

## Digital baby monitors

## Hair dryers / Electric

shavers

## Electric Heaters

## Microwave Owens /

## Refrigerators

## Mobile phones / Radio

## Transmitters / Ear

phones

## Air Conditioners

**We will not discuss the effects of each of these, however please be AWARE that they are emitting electromagnetic radiation and are silently doing their job.**

# Simple lifestyle changes can make a big difference

A comparison of the electric razor and the microwave a good example where we can rationally apply the risk / benefit concept.

Cause for both devices there are obvious alternatives that satisfactorily serve the same function.

So if we were to weigh the harmful effects of heating the food in a microwave vis a vie to Gas stove, a small amount of time overcompensates the harm caused by the Microwave radiation.

Similarly, an electrical razor can easily be replaced by normal safety razor.

So with this I leave you to ponder over these harmful effects caused by the electromagnetic radiation and how by simply replacing or changing our life style choices can help to minimize or curtail a lot of these harmful rays.

In the forthcoming issue we will discuss the safety measures to mitigate the effects of radiation and also shielding solutions.

# Vastuworld Updates

We proudly present to you our very own collaborative space at Prithwe Kurunji – The Jamun Forest.

In Mayank's words – I am a child of earth .....the earth is my child . The biggest happiness is to be free ,to roam into the mountains and to be around people who love you . If you wish to experience the almighty of God ,you must wander into the mountains . Be at Prithwe to bring out the child on you as Mother always cares .

This is a Beautiful collaborative space and open to everyone ,who want to use it for below mentioned enrichment activities .

# PrithWe Earthing Centre

## About Us

PrithWe is an Earthing Centre and a collaborative space situated on a scenic riverfront property. It has been envisioned as a multi-functional and flexible design solution, one that pushes the boundaries of conventional studios – where collaborative sessions, workshops and exhibitions can be held.

The entire site consists of a main central villa, cottages and tents for volunteers, and bamboo pavilion which acts as a shaded hands-on workshop area.

*Come create,  
Connect &  
Collaborate!*

# Earthing Centre

## What is Earthing?

Earthing is the process of staying grounded by reconnecting with your electrical roots through the earth.

It stems from the idea that in modern city life, we no longer have direct physical contact with the Earth, and therefore are losing out on purported health benefits of exchanging electrons with the surface of our planet.

Studies have found that grounding appears to provide some general health benefits, such as better sleep, less pain, reduced stress and tension, and better immune function.

*Reconnect with the Earth with  
out specially curated Grounding  
Techniques and Earth Walks!*

## Stupa

### Health Vitalizers for the Mind & Body

Stupa is a place built in the memory of great persons, sages and Tirthankaras. The Stupa was a place for distinguished masters to do deep meditation (sadhana) following the methods of Jain science of introspection and right philosophy. The stupa model is for personal telluric connection for each individual, where the Namokar Mantra act as a divine Jain scripture, energized by the vacuum of hollow space & special stone as a earth medium.

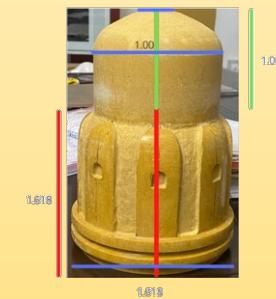

Stupa - top view

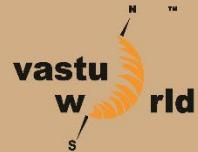

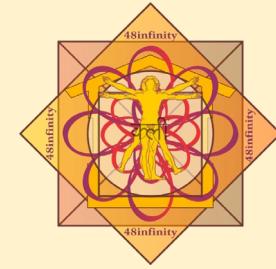

Stupa – front view

The shape and overall shape of the entire stupa model is made according to the golden section and specific mathematics.

The red colored Namokar mantra based on the floor defines a specific vibration in Prakrit language which is responsible for spiritual upliftment is beneficial.
